Energy & Resources Knowledge Hub

- ❖ One of 5 industry led, collaborative partnerships funded through NSW Department of Industry
- ❖ Administered by NIER at University of Newcastle
- ❖ Delivering programs to create shared value and drive innovation
- ❖ Focused on growing NSW businesses by connecting them to a powerful network that gives them the support and resources needed to thrive in their local region and be globally competitive.

NIER PRECINCT

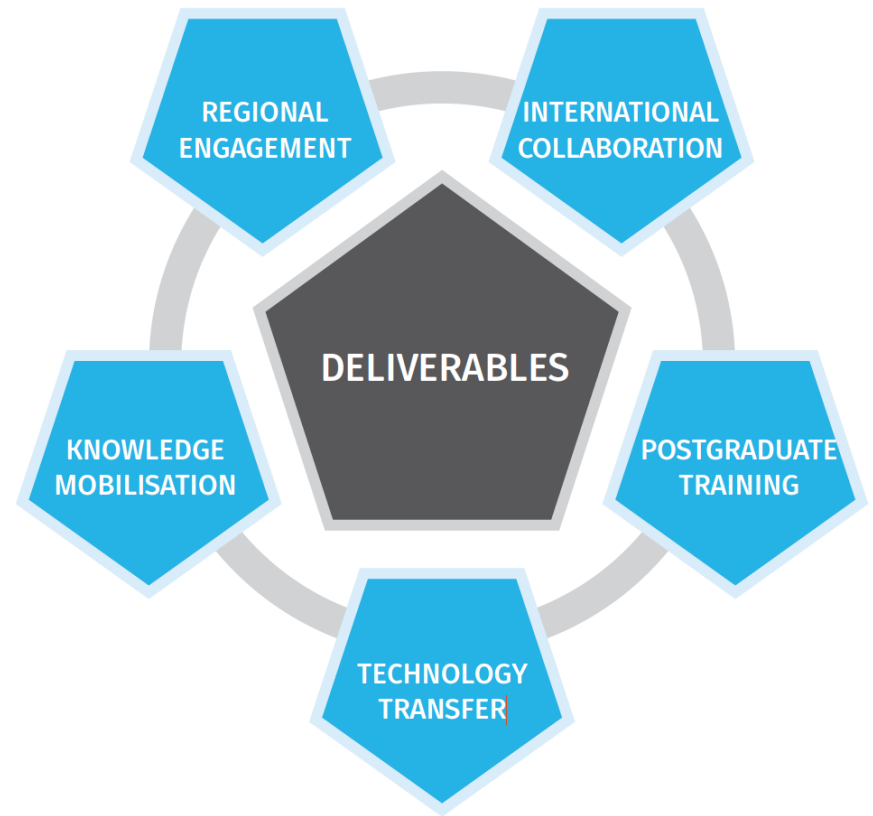

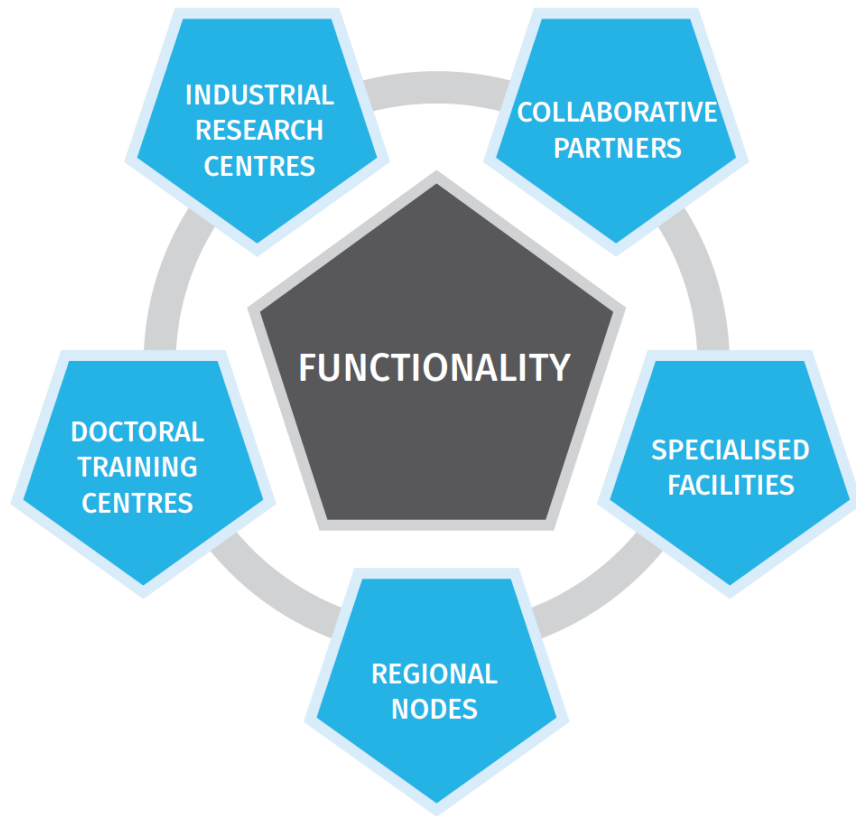

GLOBAL IMPACT CLUSTER

ENERGY | RESOURCES | FOOD | WATER

GICs foster multidisciplinary research and create opportunities for industry partners to accelerate innovation and share resources. This connected network model empowers students and researchers to tackle global challenges and make a greater collective impact through:

- Access to world-class facilities to conduct multidisciplinary research, collaborate and innovate
- Engage with new and emerging markets and industries resulting in tailored, high impact research and advancements
- Be challenged by global perspectives
- Build and be benefited by strong industry partnerships through research collaboration.

CASE STUDY

Evocra Water Solutions Evolved

- Initial focus on remediating industrial wastewater, applied to acid mine drainage
- Research through NIER uncovered increased potential beyond mining sector
- Resulted in major commercial contracts and significant expansion of business
- Now engaged in further research, accessing increased opportunities
